

Neolus[®]

Single use hypodermic needles

**Unsurpassed
comfort for both
patients and
medical staff**

A complete range to meet individual requirements

NEOLUS[®] needles represent the state of the art in modern injection technology. The carefully selected materials, combined with a systematically controlled production process result in products of superior quality and performance. Every single detail is the result of TERUMO's long time experience in this field which is appreciated by users throughout the world.

Reduced penetration force

NEOLUS[®] needles feature the ultrasharp LANCET POINT. The precisely honed edges and unique bevel design easily penetrate tissue with an incision that minimizes trauma. An exclusive silicone lubrication allows the needle to advance smoothly and avoids knocking effect.

Easy to use and safe

NEOLUS® needles are individually packed in a sterile, colour-coded blister package with clear indication of the expiry date. The transparent colour-coded hub allows for easy gauge identification and rapid observation of flashback. The moulded, rigid needle protector ensures the integrity of the needle until the moment of use.

Terumo-thin wall for increased flow rates

The Terumo-thin wall needles allow you to choose a smaller, more comfortable gauge size with increased flow rates over Regular and Thin walled needles. Additionally, injection fluids with a high viscosity can be injected more smoothly than with standard needles.

R=regular bevel (12°), S=short bevel (18,5°)

Unit box: 100 pieces.
Shipping carton: 3000 pieces.
Sterilized by ethylene oxide
